

### REMARKS

In the Office Action, the Examiner sets forth a restriction/election requirement, asserting that Figures 13C (claims 47-50) and Figure 13D (claims 42-45) correspond to two patentably distinct species. This requirement is respectfully **traversed**. The Applicant believes that the two figures are sufficiently related so that it would not be an undue burden upon the Examiner to examiner all figures in a single application. For example, the alleged two species share common patentable features such as the features recited by claim 38.

Since it is a mandatory requirement to at least provisionally elect one of the specie, the Applicant hereby **provisionally elects Fig. 13D (claims 42-45)** for prosecution in this Application. Claim 38 is a generic claim with respect to alleged embodiment 1 and embodiment 2.

It is noted that the United States Patent Law does not require that Examiners enter non-unity objections, and therefore the Examiner is requested to reconsider the non-unity objection in view of the fact that the Figures, while distinct, are sufficiently related that it would not be an undue burden upon the Examiner to examiner all figures in a single application.

The Commissioner is authorized to charge any additional fees which may be required or credit overpayment to deposit account No. 12-0415.
